## **Site guide: Mill Point**

**Location:** The site can either be accessed by heading west from the Harbour, and following the coast road along, or from the west by turning right off the A259 halfway up Sandgate Hill (between Sandgate and Folkestone).

The whole of this Lower Sandgate Road is now pay and display parking: charges apply from 8 a.m. to 8 p.m. inc. Sundays, and cost 80 pence per hour.

Alternatively, from Folkestone, head south from Sandgate Road, and there is free parking on the Leas at the top of the cliff.

The pier at Mill Point

**Facilities:** The Mermaid Café offers food and drink and there are public toilets on site. There is an adventure playground should you have children to keep occupied!

**Access/route:** There are numerous paths which allow the trees and bushes to be explored. Steps at the western end and a zigzag path to the east allow a circular route to be taken. Seawatch from the small pier. There is disabled access to most of the area if the paths without steps are used.

**Birds:** Seawatching has produced a similar range of species to Copt Point, and the site is particularly good in spring, when it offers closer views of up-channel passage from the small pier. In autumn the lack of height can be a disadvantage, especially at high tide, when spray can also be a problem.

Red-throated Divers, Great Crested Grebes, Gannets, Kittiwakes, Guillemots and Razorbills are often numerous offshore in winter, with the occasional scarce diver or grebe. March sees an up-channel passage of Brent Geese, ducks - including Garganey, and Sandwich Terns, with Black-throated Divers, Common Scoters, waders, Great and Arctic Skuas, and other terns joining in April, and Pomarine Skuas in May. Windy weather in summer can produce Manx and Balearic Shearwaters, and in autumn Brent Geese, ducks, skuas and terns feature, with divers, grebes and auks again later in the year.

Mediterranean Gulls are often present, as anywhere, and this is probably the most reliable site for Shag. Unusual species have included Great Northern Diver, Slavonian and Black-necked Grebes, Sooty and Balearic Shearwaters, Storm Petrel, Little Egret, Bewick's Swan, Barnacle Goose, Goldeneye, Avocet, Black-tailed Godwit, Long-tailed Skua, Glaucous Gull, and Little Auk.

The trees and bushes hold common passage migrants in season, and have produced Icterine Warbler, Yellow-browed Warbler, and Common Rosefinch. Visual migration can be witnessed here with pigeons, Swifts, hirundines, pipits, wagtails, and finches in good numbers and Alpine Swift, Hoopoe, Serin, Twite and Snow Bunting have been recorded.

This is not the best site for passage raptors, but Honey Buzzard, Marsh Harrier, and Montagu's Harrier have been noted.

**Regular:** Red-throated Diver, Great Crested Grebe, Fulmar, Gannet, Shag, Brent Goose, Wigeon, Gadwall, Teal, Shoveler, Eider, Common Scoter, Red-breasted Merganser, Grey Plover, Sanderling, Dunlin, Bar-tailed Godwit, Whimbrel, Common Sandpiper, Turnstone, Arctic Skua, Great Skua, Mediterranean Gull, Little Gull, Sandwich, Common and Arctic Terns, Guillemot, Razorbill, Tawny Owl, Rock Pipit, common passage migrants and visual migration, and Firecrest.

**Possible:** Scarce divers and grebes, Manx, Balearic and Sooty Shearwaters, Little Egret, Pintail, Garganey, Velvet Scoter, Avocet, Knot, Purple Sandpiper, Greenshank, Pomarine Skua, Little Tern, Black Tern, Pied Flycatcher.

**Rarities:** Storm Petrel, Bewick's Swan, Barnacle Goose, Goldeneye, Honey Buzzard, Montagu's Harrier, Black-tailed Godwit, Long-tailed Skua, Glaucous Gull, Little Auk, Alpine Swift, Hoopoe, Icterine Warbler, Yellow-browed Warbler, Serin, and Common Rosefinch
