

Cormorant

Phalacrocorax carbo

Category A

A non-breeding visitor at all times of year

An increasing visitor to Kent at all times of year, commonest in winter, and recently established as a breeding species.

The full species account will follow but the breeding and wintering distribution maps based on the 2007 – 2012 BTO / KOS atlas are provided below.

Cormorant at Seabrook (Brian Harper)

The distribution of winter records recorded in the BTO/KOS Atlas (2007 – 2012) is shown in figure 1.

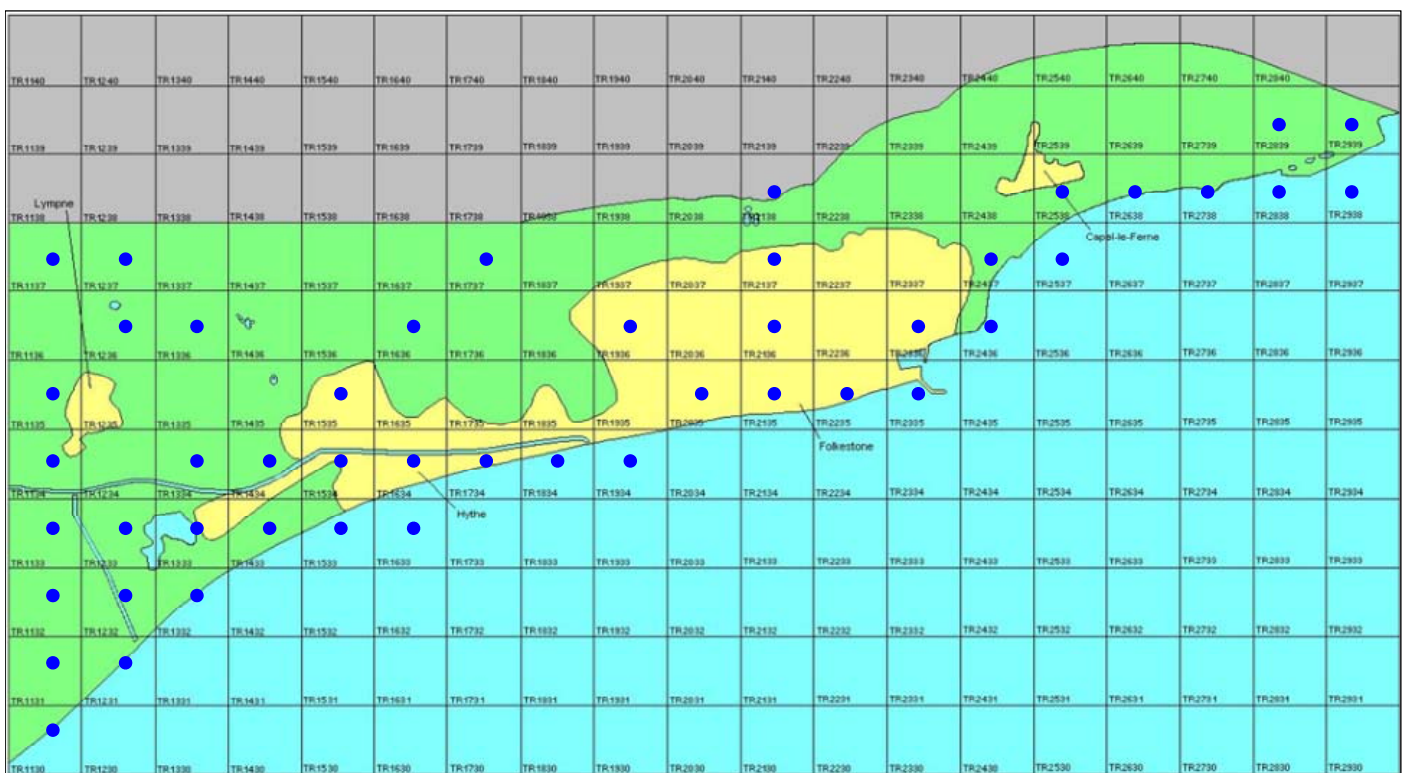

Figure 1: Wintering distribution of Cormorant at Folkestone and Hythe by 1km square
