## **Site guide: Nickoll's Quarry (a.k.a. Palmarsh or Hythe Gravel Pit)**

**Location:** From Hythe head west on the A259 towards Dymchurch. After about 3 miles there is a 'Jet' petrol station on the right hand side. Park in the lay-by on the left hand side of the road (Grid ref: TR 136333), directly opposite the garage. Cross the road and take the public footpath just to the east of the garage, with the sign 'Nickoll's Quarries Ltd'.

**Facilities:** The garage stocks the usual range of food and drink. There are toilets within the leisure complex, available to members only.

**Access/route:** There is a public footpath along the east side of the pit to the light railway. From here another footpath runs west through the sheep field, and re-crosses the railway beyond the sailing club. The footpath then runs around the perimeter of the site, beside the sewage works, to a small bridge across a reedy ditch. The path then tracks west to the 'west hedge' (an area of taller trees and scrub adjacent to the Botolph's Bridge road), and follows it south.

At the end the footpath crosses the road (there is another lay-by here which offers alternative access to the site) and runs through an area of weeds and scrub to the A259. From here follow the road east back to the garage.

Please note that the leisure complex itself is private and access is by membership only. Enquiries to the on-site bailiff or to the Nickoll's office on 01303 255152. Disabled access is

difficult due to a number of gates and stiles, but members can drive around the pit as far as the sailing club.

**Birds:** Unfortunately this is a declining habitat, with much of the better areas recently backfilled, and on the remaining open water the birds have to compete with fishing and sailing. The area is also subject to a planning proposal for housing. That said, the pit offers about the only chance locally of a number of duck and wader species, and has a record of turning up the unexpected - e.g. Squacco Heron in June 2006.

The path along the east side allows the main lake to be viewed. In winter, particularly during a cold spell, there may be duck such as Pochard, Tufted Duck, Teal and Wigeon. Scaup, Goldeneye, Smew, Goosander, and Ruddy Duck have all been recorded.

Great Crested Grebes now breed. The ditch that runs through the sheep field is worth checking for Little Egret, Water Rail, Green Sandpiper, and Kingfisher.

After the path re-crosses the railway there is a small bridge over a reedy ditch. This area has had Bluethroat once and Sedge Warbler breeds. The bushes adjacent to the sewage works have held Woodcock in winter and the field to the east often has Jack Snipe in the same season. Where the path crosses the reedy ditch again Cetti's Warblers are regular and Bearded Tits have been recorded.

The pit near the reedy ditch is being backfilled and its potential for passage waders will depend on the habitat present. Currently there is enough to attract a few Common and Green Sandpipers, Greenshank, etc., and there is still the chance of something unusual. In the past Avocet, Black-winged Stilt, Temminck's Stint, Little Stint, Curlew Sandpiper, Ruff, Black-tailed Godwit, Spotted Redshank, Greenshank, and Wood Sandpiper have all been recorded. In winter there are Snipe and Jack Snipe.

The 'west hedge' is worth checking in spring and autumn for passage migrants, as is the scrub beyond the lay-by. These areas have had Redstart, Nightingale, Ring Ouzel, Firecrest, Spotted Flycatcher etc. As you follow the road back to the garage check the trees on the left for migrants. Waxwings have occurred here.

**Regular:** breeding Great Crested Grebe, Canada Goose, Oystercatcher, Meadow Pipit, Cetti's, Reed and Sedge Warblers, and Reed Bunting; passage waders (esp. Common and Green Sandpipers) and passerines in season; wintering Water Rail, Coot, Lapwing, Green Sandpiper, Snipe and Jack Snipe.

**Possible:** Little Egret, Kingfisher; duck in winter - Tufted Duck, Pochard, Wigeon, Teal; wintering Stonechat and Chiffchaff.

**Rarities:** scarce grebes, Squacco Heron, Bittern, Spoonbill, wild swans and geese, Scaup, Goldeneye, Goosander, Smew, Ruddy Duck, Honey Buzzard, Rough-legged Buzzard, Red Kite, Osprey, Red-footed Falcon, Black-winged Stilt (twice), Woodcock, Temminck's and Little Stints, Curlew Sandpiper, Spotted Redshank, Wood Sandpiper, Glaucous and Iceland Gulls, Bee-eater, Waxwing, Nightingale, Bluethroat, Bearded Tit, Yellow-browed Warbler.
