

# Folkestone & Hythe Birds

## Site guide: Samphire Hoe

**Location:** Access is via a tunnel through the cliffs, which is located off the A20 between Dover and Folkestone, on the Folkestone-bound side of the dual carriageway. Samphire Hoe is sign-posted.

There is a pay and display car park. Charges for cars are £1 for one hour or £2 for all day. The Hoe is open from 7 a.m. to dusk every day.

**Facilities:** Refreshments are available from the Tea Kiosk, which is open every day between Easter and September, and Saturdays and Sundays at other times. Details of recent sightings are posted on a chalkboard, in a sightings book and are available from the information centre. There are toilets on site.

**Access/route:** Much of the Hoe is "accessible for all": the recommended route is shown in a free site leaflet (available from the visitor centre at the Hoe, or via the warden on 01304 225649).

**Birds:** Rock Pipit, Black Redstart and Stonechat are resident. Peregrines and Ravens are frequent along the cliffs and Mediterranean Gulls can usually be seen offshore.

Firecrests, Ring Ouzels and commoner migrants are regular, and the growing rarity list includes Long-tailed Duck, Black Kite, Long-eared Owl, Bee-eater, Shore

Lark, Wryneck, Red-rumped Swallow, Water Pipit, Icterine Warbler, Dartford Warbler, Subalpine Warbler, Asian Desert Warbler, Greenish Warbler, Yellow-browed Warbler, Pallas' Warbler, Dusky Warbler, Short-toed Treecreeper, Red-backed Shrike, Great Grey Shrike (above), Rose-coloured Starling and Serin.

The small pools attract the occasional wader and duck and even Cattle Egret on one occasion, and Water Rails are regular in winter.

Over the last few years the site has emerged as a seawatching site in the spring, with March seeing an up-channel passage of Brent Geese, ducks - including Garganey, and Sandwich Terns, and Black-throated Divers, Common Scoters, waders, Great and Arctic Skuas, and other terns joining in April, and Pomarine Skuas in May. Shelter is limited in the autumn but Manx, Balearic, and Sooty Shearwaters, Leach's Petrel, and Little Auk have been recorded.

Flyover raptors have included Honey Buzzard, Red Kite, Marsh, Montagu's and Hen Harriers, Osprey and Common Buzzard, and White Stork and Spoonbill have also been seen passing over.

**Further information:** A leaflet is available (opposite) which provides fuller details of birds and birdwatching at Samphire Hoe. It contains a map and a guide to the different areas of the Hoe, a monthly guide to the species that might be seen and a checklist of the more regular species which occur.

The leaflet is available from the visitor centre at the Hoe, or via the warden on 01304 225649 and costs 80p (+p&p if required).

Samphire Hoe is owned by Eurotunnel and managed in partnership with the White Cliffs Countryside Project.
